ASSEMBLING THE APPLIANCE

Make sure the control knob (1) is fully closed (by turning it clockwise as far as it will go). (Fig.2)

Keep the gas cartridge upright when fitting it to the valve.

Align the notch in the collar of the gas cartridge with the locator tab (2) on the valve adaptor (3) of the appliance.

Push down the valve adaptor gently in the concave part of the gas cartridge and turn the gas cartridge clockwise until “hand tightened”. (Fig.3)

If the gas cartridge is not connected correctly, you will hear a hissing sound. Ensure that a complete gas seal has been made. If you wish to check for leaks on your appliance, do it outside. Do not try to detect leaks using a flame, use soapy water. Any leakage will show up as bubbles around leakage area. If you are in doubt or you can hear or smell gas, do not attempt to light the appliance. Remove gas cartridge from the
